COMMERCIAL TEST REPORT

JASSA ROTAVATOR
‘MODEL-642 (RAJA)’

GOVERNMENT OF INDIA
MINISTRY OF AGRICULTURE
(DEPARTMENT OF AGRICULTURE & COOPERATION)

NORTHERN REGION FARM MACHINERY TRAINING AND TESTING INSTITUTE
TRACTOR NAGAR, SIRSA ROAD, HISAR-125001 (HARYANA)

Telephone : 01662-276824, 276172
Website : http://dacnet.nic.in/nrfmtti
4.8.6 Safety clutch/device : Not provided.
4.9 Rotavator Stand : Not Provided
4.10 Furrow wheel : Provided
4.11 Overall Dimensions, mm (Ref. Fig.4)
   Length : 2050
   Width : 1070
   Height : 1090
4.11.1 Mass, kg : 590

5. LABORATORY TEST

5.1 The hardness of blades was determined at edge and shank portion. The results of hardness test are tabulated in Table-I.

:: 1 Content of out of 5 primary elements (20%) is not conforming to Indian Standard.

6. FIELD TEST

The field tests of the implement comprising of dry and wet land operations were conducted for 25.0 & 15.0 hours in different soil moisture conditions to assess the performance of the implement. The details of tractor used for field operations are given in annexure-I.

The tractor PTO speed was maintained at 540 rpm. The performance of implement is reported in Annexure-II and summarized in Table-3.
6.1 Rate of Work
6.1.1 Dry land operation
-The rate of work in clay loam soil was recorded as 0.32 to 0.40 ha/h and the forward speed as 2.48 to 2.75 kmph.

-The time required to cover one hectare area was recorded as 2.50 to 3.13 h.

6.1.2 Wet land operation
-Speed of operation varied from 2.07 to 2.09 kmph.

6.2 Quality of work
6.2.1 Dry land operation
-The depth of operation was recorded as 7.9 to 8.4 cm.
-The field efficiency was recorded as 66.7 to 81.6 %.

6.2.2 Wet land operation
-Depth of puddle was recorded as 12.9 to 16.3 cm.
-Puddling index was recorded as 76.6 to 83.5%.
8. EASE OF OPERATION, ADJUSTMENTS & SAFETY

8.1 Neither the implement nor the drive (universal coupling shaft) is provided with any safety clutch/device.

8.2 The propeller shaft has telescopic sections with universal joints, to adjust the length of drive shaft, which is adequate.

8.3 Depth adjustment can be made by raising or lowering the skids.

8.4 Implement does not have provision to vary rotor shaft speed to cater to different soil and moisture conditions.

8.5 Operator has to get down from tractor to make adjustments in rotavator.

9. SOUNDNESS OF CONSTRUCTION
No breakdown occurred during 40.00 hrs of operation in the field.

10. COMMENTS & RECOMMENDATIONS

10.1 The dimension of three point linkage of the implement partly conforms to IS: 4468-March 2007 (Part-I). This should be incorporated at production level.

10.2 It is recommended to have provision for change in rotor speed to suit wider range of soil and soil moisture conditions.

10.3 Maneuverability of tractor with Rotavator and quality of work were observed to be satisfactory.

10.4 Dimensions of input shaft of rotavator do not conform to IS: 4931-Oct. 2004. This should be incorporated at production level.

10.5 The hardness of hatchet blades in the edge portion and in the shank portion was 58 HRC and 57 HRC respectively against the requirement of 53 to 59 HRC (edge portion) and 37 to 45 HRC (on shank portion) as per IS:6690-Jan. 2007. This calls for improvement at production level.

10.6 The percentage wear of hatchet blades on mass basis during field operation, ranged from 2.74 to 3.90% which is considered to be normal.

10.7 The percentage wear of hatchet blades on dimensional basis after field operation of 40.0 h, ranged from 3.38 to 4.90 % and 1.92 to 5.23 % respectively at edge and at 65 mm from edge.

10.8 The content of carbon silicon and manganese in rotavator blade are not conforming IS: 6690-Jan. 2007 requirements.
10.9 The specification of propeller shaft does not conform to IS: 4931-Oct. 2004. This should be modified according to IS requirement.

10.10 The PTO power requirement of rotavator was observed from 17.2 to 20.2 kW (23.4 to 27.4 Ps) in dry land operation and is within the recommended range. Hence 58.9 to 69.2% of tractor power was utilized during the test.

10.11 LITERATURE

The manufacture had supplied booklet on instruction manual and parts list in Hindi and English. The literature is found to be adequate for the guidance of users and service personal. However, it may be modified as per IS:8132-1983 in other regional languages.

TESTING AUTHORITY

| (R. M. TIWARI) ASSISTANT ENGINEER (W/S) |  
| (P. K. CHOPRA) SENIOR AGRICULTURAL ENGINEER |  
| (A. N. MESHRAM) - DIRECTOR - |  

:: Test report compiled by Sh. B. N. Dixit (Tech. Asstt.).
