3. TEST FOR DISCHARGE RATE OF PUMP
[vide Clause 8.3 of IS-11313: 2007]

1. Date of test: 27.08.2016
2. Atmospheric conditions:
   a) Temperature: 33.4°C
   b) Relative humidity: 41%
   c) Pressure: 730.1 mm of Hg
3. Data recorded

</table>

Minimum discharge rate = 3215 ml/min at 30 kg/cm²
Maximum discharge rate = 5900 ml/min at 15 kg/cm²

REMARK: No discharge was observed beyond 30 kg/cm² pressure i.e. discharge from delivery line.

4 TEST FOR VOLUMETRIC EFFICIENCY OF PUMP

As applicant has not specified the rated pressure and rated speed of pump, hence volumetric efficiency could not be ascertained as per the requirement of relevant code.
However, volumetric efficiency, so to speak, was found to be 82.87% & 50% at 15 kg/cm² and at 30 kg/cm² pressure respectively. Hence the Volumetric Efficiency was not found as much as required by the code throughout the range of working pressure declared by the applicant.
14. COMMENTS AND RECOMMENDATIONS

14.1 The material of piston or plunger is not as per Indian Standard. It needs to be improved.
14.2 The pressure gauge marking exceeds 2.5 times the declared value of pressure. Suitable pressure gauge may be provided to ensure the compliance of the relevant Indian Standard.
14.3 The thickness of the wall of the barrel is less than the value specified in the relevant Indian Standard. It must be improved.
14.4 The diameter of connecting rod is less than the value specified in the relevant Indian Standard. It may be looked into.
14.5 The spray nozzle is not designated and marked by its identification mark. The identification mark as specified by relevant Indian Standard, needs to be provided.
14.6 Relevant Indian Standard must be followed with regard to marking on spray gun.
14.7 As applicant has not specified the rated pressure and rated speed of pump, hence volumetric efficiency could not be ascertained. As per the requirement of relevant code, in order to facilitate the testing in the true letter and spirit, this needs to be declared.
14.8 As the applicant has not specified the specific speed for sprayer operation, the power requirement cannot be ascertained. In order to facilitate the testing in the true letter and spirit, this needs to be declared.
14.9 As the discharge rate for fine cone spray & jet spray pattern of spray gun at the pressure of 600 ± 60kPa was not declared by the applicant, the conformity of spray angle of spray gun to Cl E 3.1 of Annexure E of IS 3652-1995 could not be ascertained. In order to facilitate the testing in the true letter and spirit, this needs to be declared.
14.10 As the spray angle for fine cone spray pattern at a pressure of 600 ± 60kPa was not declared by the applicant, the conformity of discharge to Cl. E 3.2 of Annexure E of IS:3652-1995 could not be ascertained. In order to facilitate the testing in the true letter and spirit, this needs to be declared.
14.11 As the discharge rate for fine cone spray & jet spray pattern at a pressure of 300 kPa was not declared by the applicant, the conformity of discharge of nozzle to CI F 3.1 of Annexure F of IS 3652-1995 could not be ascertained. In order to facilitate the testing in the true letter and spirit, this needs to be declared.
14.12 As the spray angle for fine cone spray pattern at a pressure of 300 kPa was not declared by the applicant, the conformity of spray angle of nozzle to CI F 3.2 of Annexure F of IS:3652-1995 could not be ascertained. In order to facilitate the testing in the true letter and spirit, this needs to be declared.
14.13 A suitable labeling plate (not sticker) needs to be provided with, inter alia, following information:-
   i. Manufacturer's name
   ii. Make
   iii. Model
   iv. Month & year of manufacture
   v. Rated speed
   vi. Rated pressure
   vii. Discharge rate
   viii. Power rating of engine
   ix. SFC of engine
14.14 Safety provision/safety wear
   i) The accessories viz. mask, hand gloves and safety goggles for operator's safety has been provided with sprayer.
   ii) Safety instructions regarding handling poisonous agro-chemical and first aid MUST be supplied with the sprayer.
