25. COMMENTS & RECOMMENDATIONS

25.1 The sprayer serial number is not marked. It should be marked.

25.2 The motor serial number, motor power and rated speed is not specified. It should be specified.

25.3 As the discharge rate of nozzle at a pressure of 300 kPa for Fine cone spray and jet spray pattern does not conform to the requirement of IS: 3652:1995.

25.4 The battery serial number, model and country of origin is not specified. It should be specified.

25.5 Country of origin of battery charger is not marked. It should be marked.

25.6 The country of origin of pump is not specified. It should be specified.

25.7 The dimension of straps does not meet the requirements of Indian Standard.

25.8 The metallic threaded connection provided on sprayer does not meet the requirement of Indian Standard. It should be looked into.

25.9 The batch or code number on nozzle is not provided. It should be looked into.

25.10 The strap cushion thickness does not meet the requirement of Indian Standard.

25.11 The delivery hose length is not as per Indian Standard. It should be looked into.

25.12 The lance is not marked batch or code number. It should be marked.
25.13 The strainer is not provided in cut off device. It may be provided.

25.14 The trigger actuation force is observed more than as defined in Indian Standard. It should be examined & improved.

25.15 The strainer in nozzle is not provided. It should be provided.

25.16 Agitator is not provided in sprayer. It may be provided.

25.17 During the strap drop test the buckle/bracket of strap assembly found failed to hold the strap in its position, it should be improved.

25.18 The batch or code number of cut-off device is not marked. It should be marked.

25.19 Time required to full charge battery with AC charger is observed as 7 to 8½ hours.

25.20 The spraying operation time after fully charging the battery was observed as 6.5 to 7 hours.

25.21 The volumetric efficiency of sprayer on battery operated mode was observed as 56.51%, which is not within the requirement of the relevant Indian Standard.

25.22 The current drawn by motor at no load and on load was observed as 0.55 A and 1.4 A respectively which does not conform to requirement of IS: 14459-1997.
