5. FIELD PERFORMANCE TEST

5.1 The SMS fitted on Punjab-930combine harvester was operation in the paddy field for 5.67 hrs, to assess (a) performance of SMS and, (b) performance of combine harvester with SMS.

The crop parameters recorded during the test were as under:-

Crop Parameters

Sl.	Parameters		Observations
No.	BIRL-80		
1.	Average plant height, cm	:	95 to 105
2.	Average number of tillers/m ²	:	231 to 258
3.	Average length of ear head, cm	:	18 to 26
4.	Average straw/grain ratio		2.7
5.	Average moisture, %		
	- Grain	:	15.8
	- Straw	:	73.4

The results of field performance test of paddy crop harvesting are summarised in Table and presented in detail in Appendix – II to V.

10. COMMENTS AND RECOMMENDATIONS 10.1 Field performance test No noticeable defect observed during field test. 10.2 Applicant has recommended Punjab -930 combine harvester for SMS field testing. This is vital information and therefore the same must be inscribed in labelling plate also for the guidance of users. 10.3 In the labelling plate, the power requirement is given as 74.3 kW, whereas the power of the combine harvester recommended is 71.4 kW. This is misleading and therefore Must be looked into for corrective action. 10.4 In the labelling plate manufacture has declared the weight of SMS as 298 kg, which is misleading. The actual weight was observed as 204 kg. It may be looked into. 10.5 Ease of operation and safety provision No noticeable difficulties observed during operation of SMS. Material of SMS blade is not specified. It should be specified. 10.6 10.7 Literature supplied with the machine There was one document entitle "Operator manual and Service manual" was supplied. 1)

information on operation, adjustments and safety etc.

There was another document entitle "Super SMS parts catalogue". This too, does not qualify to be parts catalogue for the want of numbering/indexing the various parts/components of the SMS.

Therefore the Operator manual/ Service manual/ Parts catalogue need to be brought out as per IS 8132: 1999.

However, it could be anything but the operator manual, as it lacks the relevant
