#### **16. COMMENTS & RECOMMENDATIONS**

#### 16.1 Mechanical vibration

The amplitude of mechanical vibration marked as (\*) on the relevant chapter, are on drastically higher side. It is not just directly concerned with operator's health, safety and comfort, but also adversely affect the useful life of the components. In view of above, this deserve to be given top priority for corrective action.

- **16.2** The chemical composition of blades does not conform in toto, to the requirements of IS: 6690-1981. This needs to be looked into for corrective action.
- **16.3** The hardness of blades does not conform in toto, to the requirements of IS: 6690-1981. This needs to be looked into for corrective action.
- 16.4 The make and model name of governor is not specified. It should be specified.

# **17. TECHNICAL LITERATURE**

The following literatures are provided by the applicant.

- i) Operator manual
- ii) Parts Catalogue
- iii) Service manual
- iv) Owner's manual of engine

However, the manuals need to be updated as per IS: 8132-1999
